To the Human Resources Department

Subject: Application for a position in the Computer Engineering / Technology area

Dear HR Team,

I am writing to express my interest in joining your organisation. My name is Daniel del Nogal Buchanan, a third-year student of the Bachelor's Degree in Computer Engineering at the Escuela Politécnica Superior of the University of Alcalá (class of 2024–25). Throughout my academic training I have built a solid technical foundation in programming, data structures, computer architecture, and mathematical fundamentals, which I complement with a hands-on mindset and a strong drive for continuous learning.

My profile combines academic discipline with personal initiative: beyond the official curriculum, I independently explore areas such as software development, operating systems, and video game technology, which has allowed me to develop cross-cutting competencies that go well beyond the classroom. I believe that a university education, when paired with curiosity and self-directed work, provides the strongest possible foundation for integrating quickly and effectively into a demanding professional environment.

I am confident that I can bring energy, analytical ability, and a proactive attitude to your team. I adapt readily to new technological environments and particularly value workplaces where learning and continuous improvement are part of the culture. I would be delighted to elaborate on this information in a personal interview and to demonstrate how my profile aligns with the needs of your organisation.

I remain at your full disposal for any enquiries or to provide additional documentation. I thank you in advance for your time and consideration.

Yours sincerely,

Daniel del Nogal Buchanan
