

DANIEL DEL NOGAL BUCHANAN

Computer Engineering Student — Universidad de Alcalá, Class of 2028

Torrejón de Ardoz, Madrid, Spain | +34 644 543 608 | dani.del.nogal@gmail.com | linkedin.com/in/danieldnb | github.com/Danix29

EDUCATION

Universidad de Alcalá (UAH)

B.S. in Computer Engineering, Expected 2028

Alcalá de Henares, Spain

2024 – 2028

Relevant Coursework: Advanced Databases, Advanced Operating Systems, Advanced Software Engineering, Computer Networks, Artificial Intelligence, Data Structures & Algorithms

Self-Study: Fortinet Certified Fundamentals track — NSE 1, NSE 2, NSE 3 (Cybersecurity, in progress)

Humanitas Bilingual School

High School Diploma, Science & Technology

Torrejón de Ardoz, Spain

2022 – 2024

Cumlaude School

Pre-University Program, Astrophysics & Astrobiology

Madrid, Spain

2018 – 2019

EXPERIENCE

Base Aérea de Torrejón & Humanitas Bilingual School

Security, Lifesaving & Risk Management Specialist

Torrejón de Ardoz, Spain

May 2023 – Present

- Draft structured technical reports for local supervisors and international oversight bodies, written and delivered in professional English
- Apply continuous risk-assessment methodologies across infrastructure and safety parameters, proactively escalating findings before incidents occur and maintaining full regulatory compliance
- Coordinate access control and user-flow management across high-traffic military and public-access facilities, sustaining a zero-incident compliance record with national safety regulations

Humanitas Bilingual School

Swimming Instructor & Aquatic Activities Coordinator

Torrejón de Ardoz, Spain

Feb. 2025 – Present

- Design individualized training plans for 30+ students across skill levels, improving performance consistency by approximately 25% through structured progress tracking
- Maintain a zero-incident safety record across 200+ supervised sessions by enforcing compliance protocols and adapting procedures dynamically under pressure
- Produce bilingual (Spanish/English) progress reports for school management and families, coordinating with academic teams on student outcomes

PROJECTS

Automated Reporting Pipeline | Python, SQL

- Built a data-extraction and report-generation workflow over relational databases, producing structured outputs for non-technical stakeholders, analogous to cloud-based BI reporting configuration

Role-Based Access Control System | SQL, Oracle

- Implemented RBAC with layered user-permission hierarchies and full audit logging, mirroring enterprise identity-governance patterns used in platforms such as Workday

Concurrent Process Synchronization | C, Bash, Linux

- Engineered mutex-protected shared-resource logic to eliminate race conditions across concurrent processes, applying systems-level thinking to reliability under load

ADDITIONAL INFORMATION

Technical Skills: Python, Java, SQL, C/C++, Bash, Linux, Git, Oracle PL/SQL

Certifications: Fortinet Certified Fundamentals — NSE 1, NSE 2, NSE 3 (self-study, in progress)

Platforms: Workday (self-study); AI-assisted development tools (Claude Code)

Languages: Spanish (Native); English (Professional Working Proficiency, C1+)

Interests: Astrophysics, competitive swimming, long-distance van travel across Spain
